

\*Weight, Size, and Axle configuration adapted to Queensland, Australia road regulations.

**Mast:** MS-SL/71-100/XXX/001  
 -Mast Clear Height: 71ft/21.6m  
 -Maximum Static Hook Load: 200,000 lbs/889 KN (6 lines strung)  
 -Drill Line: 1 1/2" 25.4 mm  
 -Top Drive: 150T Hydraulic Top Drive  
 -Man Riding Winch: -Located and stored in Crown for maintenance and/or operations.

**Substructure:** SB-TR/12-100/XXX/001  
 -Trailer: Split Quad Axle  
 -Drill Floor Height: 12'/3.66 m  
 -BOP Handler: -Remote Controlled, self propelled and hydraulically powered handling unit capable of carrying a 16,000 BOP  
 -Engine: 700 HP Diesel Engine  
 -Drawworks: 200,000 lb hoisting capacity  
 -Iron Roughneck: Stored on carrier and telescopes to drill floor for operations.  
 -Levelling: -Operates on non-level well sites to max of +/- 2°

# TRS105 CENTERPIECE

\*Designed & Manufactured to API 4F.
